Trivia

ABOUT

I am a problem solver. From ideation to implementation, I strive to design creative solutions for all needs. My diverse background allows me understand various perspectives and keep an open mind, while also managing several projects at once. I am an incredibly dedicated, hard worker seeking a position where I can help a company prosper while demonstrating my abilities and strengthening my professional skills in branding, design, and coding.

EDUCATION

UNIVERSITY OF FLORIDA 2018
Master of Arts in Mass Communication

To further develop my passion for design, I am continuing my education at the masters level where I've gained experience in designing creative solutions for a variety of audiences. While specializing in Web Design and Online Communication, I've learned that collaboration, communication, and a couple iteration/feedback cycles help to make my work strong and effective.

SEMINOLE STATE COLLEGE 2017
Digital & Interactive Media Design Certificate

As a lifelong learner, I wanted to learn more about digital design. I found joy in learning to use programs like Photoshop, InDesign, and Illustrator; I also discovered how to express creativity through structure with Web Design.

UNIVERSITY OF CENTRAL FLORIDA 2011
Bachelor of Science in Psychology

What makes a person who they are? This is the driving question that led me to psychology. This was my first passion, and it helped shape me into who I am today. I developed a deep sense of empathy and strong communication skills.

WORK

WEB DESIGNER 2018 - Present
Popmenu, LLC

Thoughtfully and creatively uses HTML and CSS to customize restaurant information, images, and menus. My design methods bring beauty to the website and my carefully selected digital strategy helps to create a seamless user experience for the restaurant's customers.

CLASSROOM TEACHER 2012 - Present
Lake Mary High School

Delivers instruction in social studies to high school-aged students; previously taught courses in design thinking/problem solving and mathematics. I pride myself on developing and implementing new strategies that encourage student success like project-based learning.
